If you are looking for a intense, action packed, military science fiction adventure that is sure to keep you up way too late, Grab your copy of the epic first half (three novels in one) of the SkyLine series. If you are a fan of Mass Effect, Star Wars, StarCraft, or Deus Ex, you'll love this! Books in this set: The Dragon Commander The Captain, The Billionaire Boat, and The Dragon Crusader The Dogs of War --- ★★★★★ "A futuristic take on dragons, this story opens up a whole new range of possibilities! I am eager to read more." Amazon Reviewer ★★★★★ "Oh!! This story is awesome. So much to happen in such a short time. A new threat and an old one. What to do and how to get what is needed. What would you do to help every one on the planet? Would you sacrifice your humanity? Very exciting and to find out how Major General Christopher Droan will do all that is necessary to help the Humans survive." Amazon Reviewer ★★★★★ "This was a very exciting story as it got rolling along! There are multiple things happening, keeping the suspense and tension moving the story line briskly along. The characters are developed well and give the reader at least a little hope that Earth can fight back successfully. Grab your copy and find out what's going on and who could possibly be able to change the fate of the two planets!" Amazon Reviewer

A sportswriter for the San Francisco Chronicle examines one basketball season at the Skyline High School, one of the schools from the legendary Oakland Athletic League, to explore the intimate relationship between inner-city youth and basketball.

The great thing about drifting, thinks Kekoa, is that it's more about skill than expensive parts. That's good for him. Since his mom left him on the island with his grandma, his Nissan Skyline 350 is all he has to his name. Life is the opposite for Billy Cain, who can buy his way into or out of anything. But when Billy's antics threaten the few things Kekoa cares about, they'll put it to the test: does skill or money win out when it comes to wheels, winding mountain roads, honor, and love? Includes real tech specs and tuning details for the Nissan Skyline 350!

The Manhattan skyline is one of the great wonders of the modern world. But how and why did it form? Much has been written about the city's architecture and its general history, but little work has explored the economic forces that created the skyline. In Building the Skyline, Jason Barr chronicles the economic history of the Manhattan skyline. In the process, he debunks some widely held misconceptions about the city's history. Starting with Manhattan's natural and geological history, Barr moves on to how these formations influenced early land use and the development of neighborhoods, including the dense tenement neighborhoods of Five Points and the Lower East Side, and how these early decisions eventually impacted the location of skyscrapers built during the Skyscraper Revolution at the end of the 19th century. Barr then explores the economic history of skyscrapers and the skyline, investigating the reasons for their heights, frequencies, locations, and shapes. He discusses why skyscrapers emerged downtown and why they appeared three miles to the north in midtown-but not in between the two areas. Contrary to popular belief, this was not due to the depths of Manhattan's bedrock, nor the presence of Grand Central Station. Rather, midtown's emergence was a response to the economic and demographic forces that were taking place north of 14th Street after the Civil War. Building the Skyline also presents the first rigorous investigation of the causes of the building boom during the Roaring Twenties. Contrary to conventional wisdom, the boom was largely a rational response to the economic growth of the nation and city. The last chapter investigates the value of Manhattan Island and the relationship between skyscrapers and land prices. Finally, an Epilogue offers policy recommendations for a resilient and robust future skyline.
