Anathem - Wikipedia

Anathem is another incredible book by Neal Stephenson, although probably not for everyone. Highly philosophical, brimming with hard science, it is the story of a world where scientists have been more-or-less sequestered for centuries in "maths" (the scientific equivalent of a monastery), living ascetic lives and devising high philosophy of the universe. It is the story of a specific Avout ...

asked me and several other people to contribute back-of-napkin sketches depicting our conceptions of the Clock of the Long Now. These were never intended as serious design proposals--it was more of an exercise to show how different people thought about the idea.

Neal Stephenson - Anathem
Anathem excels in its worldbuilding. The mathic world Stephenson has created is novel and interesting. In a similar manner to a clockwork orange the book uses in universe slang and terminologies which you gradually come to understand over the course of the book.

It has for some time been a pet theory of mine that the common thread tying together Neal Stephenson's fictional output over the last decade is not, or at least not only, his fascination with science, technology, their development and the philosophies and worldviews that developed with them, and those philosophies and worldviews' effects on human society, but rather his desire to write an epic fantasy centering around these

Neal Town Stephenson (born October 31, 1959) is an American writer known for his works of speculative fiction. ... Following this, Stephenson wrote *Anathem* (2008), a long and detailed novel of speculative fiction. It is set in an Earthlike world, deals with metaphysics, and refers heavily to Ancient Greek philosophy. In May 2010, the Subutai Corporation, of which Stephenson was named chairman ...

SEVENEVES is a very old project; I first started thinking about it when I was working at Blue Origin, probably circa 2004. The kernel around which the story nucleated was the space debris problem, which I had been reading about, both as a potential obstacle to the company's efforts and as a possible opportunity to do something useful in space by looking for ways to remediate it.
