Beyond the Pleasure Principle is a 1920 essay by Sigmund Freud that marks a major turning point in his theoretical approach. Previously, Freud attributed most human behavior to the sexual instinct. With this essay, Freud went "beyond" the simple pleasure principle, developing his drive theory with the addition of the death drive, Todestrieb.

Beyond the Pleasure Principle. IN the psycho-analytical theory of the mind we take it for granted that the course of mental processes is automatically regulated by "the pleasure-principle": that is to say, we believe that any given process originates in an unpleasant state of tension and thereupon determines for itself such a path that its ultimate issue coincides with a relaxation of this tension, i. e. with avoidance of "pain" or with production of pleasure.

The replacement of the pleasure-principle by the reality-principle can account only for a small part, and that not the most intense, of painful experiences. Another and no less regular source of "pain" proceeds from the conflicts and dissociations in the psychic apparatus during the development of the ego towards a more highly co-ordinated organisation.
