What role do human resource managers play in the processes of technical change in organizations? What opportunities or constraints are presented by different dimensions of technical change? How does technical change affect such issues as job design, supervision, total quality management, team-working, increased flexibility, skills training and employee involvement? In addressing these central themes and debates, this book provides a systematic analysis of the relations between technical change and human resource management (HRM). The contributors draw on research and case studies to clearly demonstrate that effective technical change in organizations is integrally related to effective HRM - as much by general and line managers as by specialist personnel managers.

The six volume set LNCS 11361-11366 constitutes the proceedings of the 14th Asian Conference on Computer Vision, ACCV 2018, held in Perth, Australia, in December 2018. The total of 274 contributions was carefully reviewed and selected from 979 submissions during two rounds of reviewing and improvement. The papers focus on motion and tracking, segmentation and grouping, image-based modeling, dep learning, object recognition object recognition, object detection and categorization, vision and language, video analysis and event recognition, face and gesture analysis, statistical methods and learning, performance evaluation, medical image analysis, document analysis, optimization methods, RGBD and depth camera processing, robotic vision, applications of computer vision.

This book provides useful information on new observations and therapeutic approaches to common problems encountered in strabismus and pediatric ophthalmology. It also discusses the ocular findings in a number of rare conditions. All aspects of pediatric ophthalmology are addressed. The book describes a new strabismic condition and provides updates on research in the development of normal and abnormal monocular and binocular vision, and in ocular motility. All different strabismus types and their characterizations are covered, as well as nystagmus and other ocular motor disorders. The latest advances in relevant surgical and pharmacological management are discussed. Recent research on diseases of the lacrimal system, the anterior segment, cataracts, posterior segment, and neuro-ophthalmology is extensively covered. Update on Strabismus and Pediatric Ophthalmology presents the proceedings of the joint meeting of the VIIth Congress of the International Strabismological Association (ISA) and the 20th Annual Meeting of the American Association for Pediatric Ophthalmology and Strabismus (AAPO&S). The meeting had more than 750 participants, making it the largest conference ever held in the field of strabismus and pediatric ophthalmology.

Major progress has been made in the field of driveshafts since the authors presented their first edition of this unique reference work. Correspondingly, major revisions have been done for second edition of the German Textbook (Springer 2003), which is present here in the English translation. The presentation was adjusted, novel improvements of manufacturing and design are described, and modern aspects of production are incorporated. The design and application of Hooke's joint driveshafts is discussed as well as constant velocity joints for the construction of agricultural engines, road and rail vehicles. This work can be used as a textbook as well as a reference for practitioners, scientists, and students dealing with drive technology.

Popular Mechanics inspires, instructs and influences readers to help them master the modern world. Whether it's practical DIY home-improvement tips, gadgets and digital technology, information on the newest cars or the latest breakthroughs in science -- PM is the ultimate guide to our high-tech lifestyle.

Following a review and assessment of recent developments in capital market and banking systems, this year's International Capital Markets report reviews and assesses recent developments in mature and emerging financial markets and continues the analysis of key issues affecting global financial markets. It examines the systemic implications of the continued rapid development of the global over-the-counter derivatives markets and the expansion of foreign-owned banks into emerging markets. The report also analyzes market participants' assessments of the proposals for private sector involvement in the prevention and resolution crises.
