Turn a run-down fiberglass boat into a first-class yacht

Since it first appeared in 1991, Don Casey's This Old Boat has helped tens of thousands of sailors refurbish older fiberglass boats and has become a revered classic among boat rehabbers. This second edition is revised from first page to last with new information on electrical systems, diesel engines, refrigeration, resins, plumbing and more. Plus, more than 600 newly created illustrations enhance the book's beauty as well as its utility.

Originally published in 1984, this work is organised in three parts. Each part consists of several related chapters. Each chapter explores the assumptions and implications of a closely related group of concepts in

depth. Part 1 explores what a structure is. It considers such notions as content, context, constraint, unity, integrity, and the hierarchical and nucleate forms of organization. Part 2 critically explores the dynamic (energetic) conceptualization of psychological and social phenomena. Thus, this part considers such notions as energy, entropy, activity, confirmation, discrepancy, and resistance, as they apply to and affect the stability, activity, and changes observed in psychological and social structures. The relationship among the biological (metabolic), psychological, and social levels of analysis are explored from a rather simplified thermodynamic point of view. In Part 3 brings all these earlier considerations to bear upon

the processes by which these structures grow and develop. It explores the concept of development itself, and such related issues as the levels-by-stages model of development, the distinction between intrastructural and intergenerational development, the orthogenic principles, the process of primordial differentiation and integration, development as a dialectical process, and the relationship between growth and development. The Epilogue indicates briefly some of the implications of the present thesis for future empirical and theoretical investigations.

fishermen, have revolutionized recreational sharking. Modern Sharking is about sustainable shark fishing, and in this book, anglers will learn the latest techniques for pursuing sharks while armed with rods, reels, and a higher level of knowledge and respect for their quarry. For more than three decades, Captain Mark Sampson stood watch over chum lines, ran shark tournaments, worked with biologists, chased IGFA records, and guided thousands of clients to unique shark encounters. Now Captain, he shares the knowledge and experience that allowed him to guide friends and clients to 17 IGFA world records for sharks. In Modern Sharking, Sampson examines how to chum, rig for, bait, hook, land, clean, cook, or

Murder, sunken treasure, and pirates both ancient and modern send Doc Ford on a nightmare quest in this New York Times bestseller in Randy Wayne White's thrilling series. Marine biologist Doc Ford has been known to help his friends out of jams occasionally, but he's never faced a situation like this. His old pal Carl Fitzpatrick has been chasing sunken wrecks most of his life, but now he's run afoul of the Florida Division of Historical Resources. Its director,

Leonard Nickelby, despises amateur archaeologists, which is bad enough, but now he and his young "assistant" have disappeared--along with Fitzpatrick's impounded cache of rare Spanish coins and the list of uncharted wreck sites Fitz spent decades putting together. Some of Fitz's own explorations have been a little...dicey, so he can't go to the authorities. Doc is his only hope. But greed makes people do terrible things: rob, cheat, even kill. With stakes this high, there's no way the thieves will go quietly--and Doc's just put himself in their crosshairs.
