Communication Matters helps students move beyond an intuitive appreciation of communication to explore core principles of the discipline. By helping students take personal responsibility for their communication behaviors, by encouraging critical reflection, and by actively applying the key concepts to diverse contemporary challenges, the program fosters an understanding of the many important ways communication matters in daily life.

This text covers basic research issues and both quantitative and qualitative approaches to communication research. The guiding principle of the text is that methodological choices arise from one's research questions and hypotheses; thus, the text focuses first on the research process, and then discusses the methodological tools for understanding and conducting basic communication research projects. In the second edition, every chapter includes examples based on research from 2002 and thereafter, and revisions improve the balance of quantitative and qualitative research perspectives as well as of data collection and analytical procedures.

Communication Research: Asking Questions, Finding Answers covers basic research issues and processes, both quantitative and qualitative, appropriate for communication students with little or no previous research methods experience. The text's guiding principle is that methodological choices are made from one's research questions or hypotheses. This avoids the pitfall in which students learn one methodology or one methodological skill and then force that method to answer all types of questions. Instead of working with one methodology to answer all types of questions, students come away understanding a variety of methods and

how to apply them appropriately.

Kory Floyds approach to interpersonal communication stems from his research area where he studies the positive impact of communication on our health and well-being. Interpersonal Communication 2e shows students how effective interpersonal communication can make their lives better. With careful consideration given to the impact of computer-mediated communication, the program reflects the rapid changes of the modern world that todays students live and interact in, and helps them understand and build interpersonal skills and choices for their livesacademically, personally, and professionally.

Students preparing to succeed in today's workplace require solid training in communication skills and principles, as well as experience applying them in realistic professional contexts. In Business and Professional Communication, Kory Floyd and Peter Cardon incorporate substantial business-world experience throughout the text's principles, examples and activities. They ensure that the theories, concepts, and skills most relevant to the communication discipline are fully represented. The result is a program that helps students understand and apply communication skills in both their personal and professional lives. The 'People First' feature presents students with realistic scenarios that are sensitive, discomfoting, or tricky to manage. It then teaches students how to navigate those situations effectively. This gives students concrete skills for preserving relationships with others as they encounter these difficult conversations. Unique to the market, this text includes a dedicated chapter focused on perspective-taking: covering the processes of person-perception; common perceptual errors; the self-serving bias and the fundamental attribution error; the self-concept; and

the processes of image management. This equips students to understand and pay attention to the perspectives of others. Business and Professional Communication also includes a dedicated chapter focused on career communication, encouraging students to engage in networking and to consider the priorities and points of view of others as they seek employment and begin to interact professionally.

The Business Communication field is at a crossroads as communication technologies are reshaping how people communicate in the workplace. Business Communication: Developing Leaders for a Networked World, by Peter Cardon, puts students at the center of business communication through the author's unique focus on credibility woven throughout the textbook chapters, forward looking vision built on traditional concepts, and practitioner and case-based approach. Students are more likely to read and reflect on the text, and are better positioned to understand the essentials of efficient and effective business communication, thereby transforming them into leaders for a networked world.
