When the status quo no longer works, the contrarian perspective reigns! In this innovative business how-to, leadership expert Marcia Daszko draws on her expertise to guide leaders at any level through a three-step process to radically improve their businesses: first, recognize and stop outmoded ways of thinking that fail to move the business forward (like focusing on the bottom line, conducting performance appraisals, and searching for best practices); second, start taking steps to introduce new, innovative ways of thinking and contrarian practices (such as developing leaders with the capacity to effect change, creating an interconnected team, and seeking

knowledge through questions); and finally, transform your company into a more resilient, adaptive, and united organization. Recent studies have reported that 90% of start-ups will fail. In Silicon Valley alone, this means that more than 5,400 of the current 6,000 startups will flounder and disappear. But risky and cash-strapped start-ups are not the only corporate fatalities: More than 60% of the original Fortune 500 corporations no longer exist. Given these statistics, how can organizational leaders and their employees beat the odds and survive? The only solution is to question the usual business practices, re-think how to lead and inspire, challenge the accepted beliefs, and toss out the failures to accelerate business growth and profitability. Using Marcia's three-part stop, start, transform method, readers will learn to pursue significant untapped opportunities, achieve their organization's competitive edge, and

An entertaining and inspiring account of conquering the fear of rejection, offering a completely new perspective on how to turn a no into a yes. Jia Jiang came to the United States with the dream of being the next Bill Gates. But despite early success in the corporate world, his first attempt to pursue his entrepreneurial dream ended in rejection. Jia was crushed, and spiraled into a period of deep self doubt. But he realized that his fear of rejection was a bigger obstacle than any single rejection would ever be, and he needed to find a way to cope with being told no without letting it destroy him. Thus was born his "100 days of rejection" experiment, during which he willfully sought rejection on a daily basis--from requesting a lesson in sales from a car salesman (no) to asking a flight attendant

if he could make an announcement on the loud speaker (yes) to his famous request to get Krispy Kreme doughnuts in the shape of Olympic rings (yes, with a viral video to prove it). Jia learned that even the most preposterous wish may be granted if you ask in the right way, and shares the secret of successful asking, how to pick targets, and how to tell when an initial no can be converted into something positive. But more important, he learned techniques for steeling himself against rejection and ways to develop his own confidence--a plan that can't be derailed by a single setback. Filled with great stories and valuable insight, Rejection Proof is a fun and thoughtful examination of how to overcome fear and dare to live more boldly.

Unstoppable is a word defined as "difficult or impossible to

preclude or stop." As a human quality, it is something that we associate with people such as sports superstars, those who do whatever it takes to inspire others and lead teams to the greatest of victories. Sometimes, an idea or person can become unstoppable. Unstoppable, like Charles Lindbergh crossing the Atlantic in a solo flight when no one had thought it was possible, or track star Roger Bannister breaking the four-minute mile barrier. Not everyone can be an explorer or a great athlete, but anyone can be unstoppable in their chosen endeavors in life. If you are willing to possess an unwavering determination to succeed and a consistent willingness to learn and evolve, you can become unstoppable and triumph too. This book is about a personal struggle, one in which the author awoke from a coma after a terrible accident and faced a life of permanent paralysis. A long battle of driven determination resulted
