This book constitutes the proceedings from a symposium titled Separations for the Nuclear Fuel Cycle in the 21st Century which was held in March 2004. This symposium focused on assessing the current state-of the art in nuclear separations science and technology, and on identifying R&D directions required to enable nuclear separations to meet 21st Century demands for waste minimization, environment protection, safety, and security. Several recent developments have elevated the importance of this topic including: the potential effects of global warming caused by carbon dioxide emissions from burning of fossil fuels; rising demand for the electric power that is needed to raise the global standard of living; geopolitical issues such as those related to nuclear proliferation and nuclear terrorism. Although expansion of fission-based nuclear power would help reduce the potential for global warming, future development of the nuclear fuel cycle must be weighed against the issues of proliferation and management of irradiated fuel. Separations will play a central role in addressing these issues. The subject matter of this book is organized into five topical areas. These are: 1) current trends and direction to the future, 2) aqueous processing, 3) emerging separations systems, 4) actinide/lanthanide separations, and 5) solution-solid interactions. This collection of papers provides a snapshot of the current state of nuclear separations chemistry and can be used to help guide future directions in this critical technological field.

Modern projects are all about one group of people delivering benefits to others, so it's no surprise that the human element is fundamental to project management. The Gower Handbook of People in Project Management is a complete guide to the human dimensions involved in projects. The book is a unique and rich compilation of over 60 chapters about project management roles and the people who sponsor, manage, deliver, work in or are otherwise important to project success. It looks at the people-issues that are specific to different sectors of organization (public, private and third sector); the organization of people in projects, both real and virtual; the relationship between people, their roles and the project environment; and the human behaviours and skills associated with working collaboratively. Thus this comprehensive and innovative handbook discusses all the important topics associated with employing, developing and managing people for successful projects. The contributors have been drawn from around the world and include experts ranging from practising managers to academics and advanced researchers. The Handbook is divided into six parts, which begin with management and project organization and progress through to more advanced and emerging practices. It benefits hugely from Lindsay Scott's expert knowledge and experience in this field and from Dennis Lock's contributions and meticulous editing to ensure that the text and illustrations are always lucid and informative.

I originally developed this book for my networking students at the community college where I teach and it is at their urging I have decided to publish this book. Since then, thousands of copies have gone out and the book has been adopted at several other colleges and schools. My goal was to produce a book that was targeted to a single topic (IPv4 subnetting) that was inexpensive, and was easy to read (less than 100 pages). I also wrote the book to be used from time to time; not relegated to a shelf where it would gather dust. My students have loved the book over the years and I know you will too.

A year's spiritual journey with other women of faith.

This account of totally positive matrices treats their central properties with full proofs and a complete bibliography.

She is Mefertiti-beautiful and revered. With her husband, Akhenaten, she rules over Egypt, the most affluent, formidable, sophisticated empire in the ancient world. But an epic power struggle is afoot, brought on by the royal couple's inauguration of an enlightened new religion and the construction of a magnificent new capital. The priests are stunned by the abrupt forfeiture of their traditional wealth and influence; the people resent the loss of their gods-and the army is enraged by the growing turbulence around them. Then, just days before the festival that will celebrate the new capital, Mefertiti vanishes. Rahotep, the youngest chief detective in the Thebes division, has earned a reputation for his unorthodox yet effective methods. Entrusted by great Akhenaten himself with a most secret investigation, Rahotep has but ten days to find the missing Queen. If he succeeds, he will bask in the warmth of Akhenaten's favor. But if Rahotep fails, he and his entire family will die.
