Late Cainozoic Floras Of Iceland

Late Cainozoic Floras of Iceland Book Subtitle 15 Million Years of Vegetation and Climate History in the Northern North Atlantic
Authors. Thomas Denk; Friðgeir Grimsson; Reinhard Zetter; Leifur A. Símonarson; Series Title Topics in Geobiology Series Volume 35
Copyright 2011 Publisher Springer Netherlands Copyright Holder Springer Science+Business Media B.V. eBook ISBN

Late Cainozoic Floras of Iceland - 15 Million Years of ...

'This beautifully-illustrated monograph of the macro- and microfloras from the late Cenozoic of Iceland is a worthy successor to Oswald Heer's "Flora fossilis arctica". Its broad scope makes it a must for all scientists interested in climatic change and palaeobiogeography in the North Atlantic region. It will remain a classic for years to come.'

The Miocene floras of Iceland and their significance for late Cainozoic North Atlantic biogeography. THOMAS DENK.
Corresponding Author ...

The Miocene floras of Iceland and their significance for ...

The type of vegetation in four plant-bearing sedimentary formations from the late Mid Miocene to Late Miocene, the 12 Ma Brjánslækur-Seljá Formation, the 10 Ma Tröllatunga-Gautshamar Formation, the 9-8 Ma Skarðsströnd-Mókollsdalur Formation, and the 7-6 Ma Hreðavatn-Stafholt Formation, corresponds to a humid temperate broadleaved (deciduous)-coniferous mixed forest dominated by Betulaceae, Fagaceae and Acer. Changes in species composition in the sedimentary formations ...

The Miocene floras of Iceland and their significance for ...

The main finding is that the Miocene flora of Iceland belongs to a

Read Free Late Cainozoic Floras Of Iceland 15 Million Years Of Vegetation And Climate

widespread Neogene northern hemispheric floral type including plants whose representatives are restricted to East Asia, North America and to western Eurasia at the present time. Previously inferred conspicuous similarities to North American modern equivalents appear to be misleading.

Miocene floras of Iceland and their significance for late ...

This book examines the plant fossil record from Iceland over the past 15 million years. It details 11 sedimentary rock formations holding over 320 plant taxa and describes palaeoecology and floristic affinities within the Northern Hemisphere for each flora.

Being the only place in the northern North Atlantic yielding late Cainozoic terrestrial sediments rich in plant fossils, Iceland ...
