In the past, foreign shocks arrived to national economies mainly through trade channels, and transmissions of such shocks took time to come into effect. However, after capital globalization, shocks spread to markets almost immediately. Despite the increasing macroeconomic dangers that the situation generated at emerging markets in the South, nobody at the North was ready to acknowledge the pro-cyclicality of the financial system and the inner weakness of “decontrolled” financial innovations because they were enjoying from the “great moderation.” Monetary policy was primarily centered on price stability objectives, without considering the mounting credit and asset price booms being generated by market liquidity and the problems generated by this glut. Mainstream economists, in turn, were not majorly attracted in integrating financial factors in their models. External pressures on emerging market economies (EMEs) were not eliminated after 2008, but even increased as international capital flows augmented in relevance thereafter. Initially economic authorities accurately responded to the challenge, but unconventional monetary policies in the US began to create important spillovers in EMEs. Furthermore, in contrast to a previous surge in liquidity, funds were now transmitted to EMEs throughout the bond market. The perspective of an increase in US interest rates by the FED is generating a reversal of expectations and a sudden flight to quality. Emerging countries’ currencies began to experience higher volatility levels, and depreciation movements against a newly strong US dollar are also increasingly observed. Consequently, there are increasing doubts that the “unexpected” favorable outcome observed in most EMEs at the aftermath of the Global Financial Crisis (GFC) would remain.

This issue of Neuroimaging Clinics of North America focuses on Headache and Chiari Malformation, and is edited by Dr. Noriko Salamon. Articles will include: Adult headache and neuroimaging: Indication of neuroimaging in general and economical overview; Headache caused by intracranial hypotension CSF leak; Headache caused by sinus disease; Headache and Chiari malformation; Headache and aneurysm; Treatment of headaches; Headache and neuroimaging: Indication and modality of choice in headaches in pediatrics; Headache and brain tumor; Headache and advanced neuroimaging:

Understanding pain circuit and functional assessment of head pain; and more!

The goal of the book is to present the latest research on the new challenges of data technologies. It will offer an overview of the social, ethical and legal problems posed by group profiling, big data and predictive analysis and of the different approaches and methods that can be used to address them. In doing so, it will help the reader to gain a better grasp of the ethical and legal conundrums posed by group profiling. The volume first maps the current and emerging uses of new data technologies and clarifies the promises and dangers of group profiling in real life situations. It then balances this with an analysis of how far the current legal paradigm grants group rights to privacy and data protection, and discusses possible routes to addressing these problems. Finally, an afterword gathers the conclusions reached by the different authors and discuss future perspectives on regulating new data technologies.

"This chapter principally reviews the development of the law in the United States since the Pentagon Papers decision. It then more briefly addresses three related subjects: the difficulties in assessing the effectiveness of the Pentagon Papers regime in permitting disclosures that benefit public debate more than they harm national security while discouraging leaks that cause more harm than good; how the US legal framework for handling national security information compares to the United Kingdom's; and how technological and institutional changes over the five decades since the Pentagon Papers decision have called into question some of that decision's premises. I. Developments in US Law Since the Pentagon Papers case, the government only rarely has sought to enjoin publication of material-and only once succeeded in winning an injunction on the ground that publication threatened national security. When courts have examined questions of prior restraints, they have consistently looked to the Pentagon Papers decision's reaffirmance of the presumptive unconstitutionality of prior restraints. Since 1971, the government has never sought criminal penalties against the press for merely receiving or publishing classified information. It has, however, brought criminal prosecutions against government employees who leaked classified information to the press without authorization, and it has also sought to prosecute non-media third parties for their role in disseminating information leaked to them by government insiders. The influence of *New York Times Co.* has been much more limited in these prosecutions. Indeed, in criminal prosecutions brought against leakers, the Pentagon Papers case has often been sidelined as a "prior restraint case," or not mentioned at all. Recently, the government has broken new ground by bringing criminal charges against an organization that some consider to be part of the press-WikiLeaks-alleging that it actively participated in and abetted a leak of classified information. The relevance of *New York Times Co.* to that situation is uncertain"--

The World Economic Forum regards the threat of cyber attack as one of the top five global risks confronting nations of the world today. Cyber attacks are increasingly targeting the core functions of the economies in nations throughout the world. The threat to attack critical infrastructures, disrupt critical services, and induce a wide range of dam

Over the past 30 years sustainability has become increasingly important to scholarly research and business in practice. This book explores a variety of challenges faced by businesses when becoming sustainable and how this links to economic development and its corruption, ethical and taxation implications. Showcasing an interdisciplinary approach, the chapters explore topics such as business ethics, corporate responsibility, tax governance and sustainability practice.

The two-volume set, LNCS 8712 and LNCS 8713 constitutes the refereed proceedings of the 19th European Symposium on Research in Computer Security, ESORICS 2014, held in Wroclaw, Poland, in September 2014. The 58 revised full papers presented were carefully reviewed and selected from 234 submissions. The papers address issues such as cryptography, formal methods and theory of security, security services, intrusion/anomaly detection and malware mitigation, security in hardware, systems security, network security, database and storage security, software and application security, human and societal aspects of security and privacy.

From the future of work to the nature of our closest relationships, how do we understand the links between our personal troubles and wider public issues in society today? Now into its fourth edition, *Public Sociology* continues to highlight the relevance of a grounded sociological perspective to Australian social life, as well as encouraging students to apply a sociological gaze to their own lives and the communities in which they live. *Public Sociology* presents a wide range of topics in a user-friendly and accessible way, introducing key theories and research methods, and exploring core themes, including youth, families and intimate relationships, class and inequality and race and ethnic relations. All chapters have been extensively revised to bring them up to date in a fast-changing social world, reflecting the latest sociological debates in response to changing lifestyles and evolving political landscapes. In addition to updated statistics and research findings, an expanded glossary and the latest citations to the scholarly literature, the text features a completely new chapter on gender and sexualities with expanded discussion of LGBTIQ+. This new edition also explores contemporary issues ranging from the #MeToo movement to marriage equality, fake news and 'alt facts'. This is the essential sociological reference to help students make sense of a complex and challenging world. NEW TO THE FOURTH EDITION: * A new chapter on gender and sexualities and expanded discussion of intersectionality * Exploration of the latest social issues including #MeToo, rising inequality, and the 'post-truth' age * All chapters thoroughly revised and updated with the latest research * Updated book website with extra readings, YouTube clips, and case studies * A new feature, Visual Sociology, helps the reader analyse the power of visual messaging 'With a firm base in the richest traditions of the discipline and with a remarkably approachable format, this book offers an excellent introduction to a wide array of sociology's concerns, making it suitable for all Australian social science undergraduates.' Gary Wickham, Emeritus Professor of Sociology, Murdoch University 'A sophisticated yet accessible introduction to social identities, differences and inequalities, and social transformations.' Jo Lindsay, Professor in Sociology, Monash University 'Sweeping and lucid...communicates with ease and simplicity.' Toni Makkai, Emeritus Professor, College of Arts and Social Sciences, Australian National University

"Men of the World will be seized upon by academics and activists facing up to the persistence, proliferation and transnationalization of patriarchies." - Cynthia Cockburn, City University, London and University of Warwick "This is an important, thought-provoking and incredibly timely book from one of the leading scholars in the field of men and masculinities. I cannot praise this wonderful book highly enough." - Richard Collier, Newcastle University "In this lively and engaging new book, Hearn looks back over nearly 40 years in feminist-framed studies of men and masculinities, and also forward to the futuristic scenarios through which gender power is currently evolving in transpatriarchal contexts." - Terrell Carver, University of Bristol What have men and globalization got to do with each other? How are men shaping and being shaped by globalization? How is globalization gendered? Why do many books on globalization fail to discuss gender relations? And why do many of those that do omit an explicit and developed analysis of men and gender relations? *Men of the World* brings together autobiographical reflections and memories on changing personal locations, contemporary empirical studies on major power processes, and up to date theoretical development. It considers the implications of debates on globalization for analyzing men, and the implications of debates on men and masculinities for globalization, transnational change and transnational patriarchies, as part of engagement and critique focused on the global North. Specific chapters address diverse transnational issues: transnational bodies and emotions in violence, violation and militarism; transnational organizing across states, big business, global finance, and activism; transnational movements in the environment, migration, and information and communication technologies and sexualities; and finally, challenges to the gender category of 'men'. An essential read for students and researchers of gender, sexuality, masculinity, intersectionality, and globalization across the social sciences. Jeff Hearn is Guest Faculty Research Professor, Gender Studies, Örebro University, Sweden; Professor of Management and Organization, Hanken School of Economics, Finland; Professor of Sociology, University of Huddersfield, UK.

This book constitutes the thoroughly refereed post-conference proceedings of the 7th International Conference on Passwords, PASSWORDS 2014, held in Trondheim, Norway, in December 2014. The 8 revised full papers presented together with 2 revised short papers were carefully reviewed and selected from 30 initial submissions. The papers are organized in topical sections on hash functions, usability, analyses and new techniques.
