The fifth way of making new fruits from old combines hybridization of species with chromosome doubling. When less closely related species of plants are crossed, the offspring are frequently vigorous but sterile. Chromosome doubling by means of colchicine restores fertility, often in full measure. Not New in the Absolute Sense

New Fruit from Old ☐ Watchtower ONLINE LIBRARY

The development of agriculture from Neolithic to the modern era is characterized by continued exchanges of crops and genes such that the centers of origin of most crops have become distinct from their centers of production. This trend continued unabated in the twentieth century. The creation of new fruits from the exploitation of unique genotypes of once-gathered crops (avocado, blueberry, kiwifruit, macadamia) is the glory of twentieth-century horticulture.

Old-fashioned fruits full of charm. Fig, medlar, mulberry and citrus trees were 19 th century favourites that are now enjoying something of a revival. To be successful with these fruits you must take a little extra care, but there are some tried and tested techniques to help you establish them in your garden.

Old-fashioned fruits 1 The Lichfield Planter Company

The first bananas may have been cultivated at least 7,000 years ago ☐ and possibly as early as 10,000 years ago ☐ in what is now Papua New Guinea. They were also grown in Southeast Asia . Modern bananas came from two wild varieties, Musa acuminata and Musa balbisiana , which had large, hard seeds, like the ones in this photo.
