This book is an introduction to construction contract administration and

File Type PDF New Home Construction Contract

management, covering the delivery and execution stage of a construction project and the various issues which the contract administrator needs to proactively manage. It can therefore be used as a contract administrator's

File Type PDF New Home Construction Contract

resource book covering what needs to be done (and why) to keep a construction project on track from a commercial and contractual perspective. It is particularly appropriate for students and new

File Type PDF New Home Construction Contract

practitioners from varied construction professions and whilst it covers domestic (UK) projects, it will be particularly useful for those studying and working on international projects where terminology,

File Type PDF New Home Construction Contract

procedures and legal systems may differ from the UK. The content is split into four parts and is subdivided into easy-to-read chapters replicating the timeline of a project during the construction stage: Part A

File Type PDF New Home Construction Contract

covers initiating the construction stage, project delivery mechanisms, contract administration and health and safety management; Part B covers managing the construction stage, contractor

File Type PDF New Home Construction Contract

performance and relationship management; Part C covers finalising the construction stage, project completion and close-out; Part D covers claims and disputes.

Introduction to Construction Contract Management will be

File Type PDF New Home Construction Contract

particularly useful for students enrolled on global construction programmes together with international distance learning students and non-cognate graduates starting out on an international career in

File Type PDF New Home Construction Contract

construction contract
administration and quantity
surveying.

Changes to the work on
construction projects are a
common cause of dispute.
Such variations lead to

File Type PDF New Home Construction Contract

thousands of claims in the UK every year and many more internationally. Liability for variations is not only relevant to claims for sums due for extra work but this is also an important underlying factor in many

File Type PDF New Home Construction Contract

other construction disputes, such as delay, disruption, defects and project termination. This is the first book to deal exclusively with variations in construction contracts and provide the detailed and

File Type PDF New Home Construction Contract

comprehensive coverage that it demands. Construction Contract Variations analyses the issues that arise in determining whether certain work is a variation, the contractor's obligation to undertake such work as well

File Type PDF New Home Construction Contract

as its right to be paid. It deals with the employer's power to vary and the extent of its duties to approve changes. The book also analyses the role of the consultant in the process and the valuation of

File Type PDF New Home Construction Contract

variations. It reviews these topics by reference to a range of construction contracts. This is an essential guide for practitioners and industry professionals who advise on these issues and have a role

File Type PDF New Home Construction Contract

in managing, directing and compensating change. Participants in the construction industry will find this book an invaluable guide, as will specialists and students of construction law, project management and

File Type PDF New Home Construction Contract

quantity surveying.
