For formal headshots, a classic lighting setup with two lights works well. Any photographer should know how to position the model properly for headshots. The subject should be turned with their body 45 degrees away from the camera and towards the main light, while their face should be straight towards the camera.

Indoor Setup With No Natural Light It's not uncommon to be asked to shoot in a room with no windows and terrible overhead lighting. This calls for a quick studio setup that can provide simple, yet effective, lighting for business headshots. First you'll want to find a blank wall to use as backdrop.

I typically use a standard soft box for the Fill Light. You can see in the photo slider that these two lights together provide an excellent headshot  $\square$  but, we can do better! Accent Light (#3)  $\square$  Many photographers refer to this light as a hair light or even an edge light. I do not use this to light the subject's hair as much as I do to provide some accent lighting along the subject's head and shoulder to help visually separate them from them from the background.

Use features like bookmarks, note taking and highlighting while reading Photographing Headshots: Techniques for Lighting and Posing the Close-Up.

### Photographing Headshots: Techniques for Lighting and ...

Conventional wisdom around headshots recommends white, soft light against a white background. However, both hard and soft light can work well in headshots with the proper planning and consideration. "It really just depends on the choices you're making and the look that you're going for," Heather Concannon, who has a master's degree in studio lighting, says.

### Guide to headshot photography - pro portraits | Adobe

Place your key light, preferably in a VERY large umbrella, almost directly in front of and well above your subject. You will bounce the light into the umbrella, NOT shoot through it. Place a large white or silver reflector at a 45 degree angle directly under the subject's face, low enough not to be in the photo.
