Movies matter – that is the message of Reel to Real, bell hooks' classic collection of essays on film. They matter on a personal level, providing us with unforgettable moments, even life-changing experiences and they can confront us, too, with the most profound social issues of race, sex and class. Here bell hooks – one of America's most celebrated and thrilling cultural critics – talks back to films that have moved and provoked her, from Quentin Tarantino's Pulp Fiction to the work of Spike Lee. Including also her conversations with master filmmakers such as Charles Burnett and Julie Dash, Reel to Real is a must read for anyone who believes that movies are worth arguing about.

On social aspects of movies and how film teaches its audience

When the 2016 Oscar acting nominations all went to whites for the second consecutive year, #OscarsSoWhite became a trending topic. Yet these enduring racial biases afflict not only the Academy Awards, but also Hollywood as a whole. Why do actors of color, despite exhibiting talent and bankability, continue to lag behind white actors in presence and prominence? Reel Inequality examines the structural barriers minority actors face in Hollywood, while shedding light on how they survive in a racist industry. The book charts how white male gatekeepers dominate Hollywood, breeding a culture of ethnocentric storytelling and casting. Nancy Wang Yuen interviewed nearly a hundred working actors and drew on published interviews with celebrities, such as Viola Davis, Chris Rock, Gina Rodriguez, Oscar Isaac, Lucy Liu, and Ken Jeong, to explore how racial stereotypes categorize and constrain actors. Their stories reveal the day-to-day racism actors of color experience in talent agents' offices, at auditions, and on sets. Yuen also exposes sexist hiring and programming practices, highlighting the structural inequalities that actors of color, particularly women, continue to face in Hollywood. This book not only conveys the harsh realities of racial inequality in Hollywood, but also provides vital insights from actors who have succeeded on their own terms, whether by sidestepping the system or subverting it from within. Considering how their struggles impact real-world attitudes about race and diversity, Reel Inequality follows actors of color as they suffer, strive, and thrive in Hollywood.

What are the conditions needed for our nation to bridge cultural and racial divides? By "writing beyond race," noted cultural critic bell hooks models the constructive ways scholars, activists, and readers can challenge and change systems of domination. In the spirit of previous classics like Outlaw Culture and Reel to Real, this new collection of compelling essays interrogates contemporary cultural notions of race, gender, and class. From the films Precious and Crash to recent biographies of Malcolm X and Henrietta Lacks, hooks offers provocative insights into the way race is being talked about in this "post-racial" era.

First published in 1994. Routledge is an imprint of Taylor & Francis, an informa company.

This study looks beyond reflection theories of the media to examine cinema's active participation in the operations of racism - a complex process rooted in the dynamics of representation. Written for undergraduates and graduate students of film studies and philosophy, this work focuses on methods and frameworks that analyze films for their production of meaning and how those meanings participate in a broader process of justifying, naturalizing, or legitimizing difference, privilege, and violence based on race. In addition to analyzing how the process of racism is articulated in specific films, it examines how specific meanings can resist their function of ideological containment, and instead, offer a perspective of a more collective, egalitarian social system - one that transcends the discourse of race.

In the critical essays collected in Black Looks, bell hooks interrogates old narratives and argues for alternative ways to look at blackness, black subjectivity, and whiteness. Her focus is on spectatorship—in particular, the way blackness and black people are experienced in literature, music, television, and especially film—and her aim is to create a radical intervention into the way we talk about race and representation. As she describes: "the essays in Black Looks are meant to challenge and unsettle, to disrupt and subvert." As students, scholars, activists, intellectuals, and any other readers who have engaged with the book since its original release in 1992 can attest, that's exactly what these pieces do.

Discusses what black males fear most, their longing for intimacy, the pitfalls of patriarchy, and the destruction of oppression through redemption and love.

This is the first major collection of criticism on Black American cinema. From the pioneering work of Oscar Micheaux and Wallace Thurman to the Hollywood success of Spike Lee, Black American filmmakers have played a remarkable role in the development of the American film, both independent and mainstream. In this volume, the work of early Black filmmakers is given serious attention for the first time. Individual essays consider what a Black film tradition might be, the relation between Black American filmmakers and filmmakers from the diaspora, the nature of Black film aesthetics, the artist's place within the community, and the representation of a Black imaginary. Black American Cinema also uncovers the construction of Black sexuality on screen, the role of Black women in independent cinema, and the specific question of Black female spectatorship. A lively and provocative group of essays debate the place and significance of Spike Lee Of crucial importance are the ways in which the essays analyze those Black directors who worked for Hollywood and whose films are simplistically dismissed as sell-outs, to the Hollywood "master narrative," as well as those "crossover" filmmakers whose achievements entail a surreptitious infiltration of the studios. Black American Cinema demonstrates the wealth of the Black contribution to American film and the complex course that contribution has taken. Contributors: Houston Baker, Jr., Toni Cade Bambara, Amiri Baraka, Jackie Bobo, Richard Dyer, Jane Gaines, Henry Louis Gates, Jr., Ron Green, Ed Guerrero, bell hooks, Phyllis Klotman, Ntongele Masilela, Clyde Taylor, and Michele Wallace.

What does it mean to call a place home? Who is allowed to become a member of a community? When can we say that we truly belong? These are some of the questions of place and belonging that renowned cultural critic bell hooks examines in her new book, Belonging: A Culture of Place. Traversing past and present, Belonging charts a cyclical journey in which hooks moves from place to place, from country to city and back again, only to end where she began—her old Kentucky home. hooks has written provocatively about race, gender, and class; and in this book she turns her attention to focus on issues of land and land ownership. Reflecting on the fact that 90% of all black people lived in the agrarian South before mass migration to northern cities in the early 1980s, she writes about black farmers, about black folks who have been committed both in the past and in the present to local food production, to being organic, and to finding solace in nature. Naturally, it would be impossible to contemplate these issues without thinking about the politics of race and class. Reflecting on the racism that continues to find expression in the world of real estate, she writes about segregation in housing and economic racialized zoning. In these critical essays, hooks finds surprising connections that link of the environment and sustainability to the politics of race and class that reach far beyond Kentucky. With characteristic insight and honesty, Belonging offers a remarkable vision of a world where all people--wherever they may call home--can live fully and well, where everyone can belong.
