This book analyses media conglomerates owning multiple media holdings under centralized ownership within and across media markets. It argues that Asian capitalists utilize both a market-oriented ideology and family connections to build their media empires, thereby creating cultural conglomerates that exercise corporate censorship over media markets. It focuses on family-controlled media conglomerates in Korea, specifically the international business giant, Samsung, and its related media companies, Cheil Jedang and JoongAng Ilbo, all of which are controlled by the single Lee family. Utilizing the theoretical approach of political economy of communication, the book examines how and why the Lee family exercise corporate censorship over Korean society. Offering an essential take on Asia's political economy of communication in order to understand the workings of Asian media empires, this book will appeal to students and scholars of Korean Studies, Korean Business and Mass Communications.

A concise yet detailed guide to the standards applying to fixed-line and mobile digital television and the underlying principles involved.

Discusses the players, theories, and trends that affect how the world communicates and gets their information This book is the most definitive text on multinational communication and media conglomerates, exploring how global media influences both audiences and policy makers around the world. Comprehensively updated to reflect the many fast moving developments associated with this dynamic field, this new edition investigates who and where certain cultural products are coming from and why, and addresses issues and concerns about their impact all over the world. Global Communication: Theories, Stakeholders and Trends, 5th Edition is framed by two theories. One is World System Theory (WST), which views nations through an economic lens. The other, Electronic Colonialism Theory (ECT), views nations through a cultural lens. Through these theories, the book examines broadcasting, mass media, and news services ranging from MSNBC, MTV, and CNN to television sitcoms and Hollywood export markets. It investigates the roles of the major players, such as News Corp, Sony, the BBC, Disney, Bertelsmann, Viacom, or Time Warner, and probes the role of advertising and the Internet and their ability to transcend national boundaries and beliefs. New chapters look at the growing importance and significance of other major regions such as the media in the Middle East, Europe, and Asia. Outlines the major institutions, individuals, corporations, technologies, and issues that are altering the international information, telecommunication, and broadcasting order Focuses on a broad range of issues, ranging from social media and new services like Netflix, as well as Arab and Asian media Explains and interprets three major movements or theories: NWICO, Electronic Colonialism, and World System Theory Includes major updates to the chapter on the Internet to incorporate global events over the last 5+ years (such as Russian use thereof, Facebook, Google) Looks at how streaming services such as Netflix, Amazon, Spotify, and more have emerged as dominant players in world entertainment Offers an updated instructor's website with instructor's manual, test banks, and student activities Global Communication: Theories, Stakeholders and Trends, 5th Edition is intended as an upper-level, undergraduate text for students in courses on International/Global Communication, Global Media/Journalism, and Media Systems in Journalism, Communications, or Media Studies Departments.

Global mobile satellite communications (GMSC) are specific satellite communication systems for maritime, land and aeronautical applications. It enables connections between moving objects such as ships, vehicles and aircrafts, and telecommunications subscribers through the medium of communications satellites, ground earth stations, PTT or other landline telecommunications providers. Mobile satellite communications and technology have been in use for over two decades. Its initial application is aimed at the maritime market for commercial and distress applications. In recent years, new developments and initiatives have resulted in land and aeronautical applications and the introduction of new satellite constellations in non-geostationary orbits such as Little and Big LEO configurations and hybrid satellite constellations as Ellipso Borealis and Concordia system. This book is important for modern shipping, truck, train and aeronautical societies because GMSC in the present millennium provides more effective business and trade, with emphasis on safety and commercial communications. Global Mobile Satellite Communications is written to make bridges between potential readers and current GMSC trends, mobile system concepts and network architecture using a simple mode of style with understandable technical information, characteristics, graphics, illustrations and mathematics equations. Global Mobile Satellite Communications represents telecommunications technique and technology, which can be useful for all technical staff on vessels at sea and rivers, on all types of land vehicles, on planes, on off shore constructions and for everyone possessing satellite communications handset phones.

PCMag.com is a leading authority on technology, delivering Labs-based, independent reviews of the latest products and services. Our expert industry analysis and practical solutions help you make better buying decisions and get more from technology.

This is the definitive practical guide to fault-finding, troubleshooting and servicing satellite television equipment, both indoors and outdoors. It will take you through all areas of satellite television system servicing from the simplest fixed dish to fully motorised systems. From PAL to Mac to MPEG all contemporary systems are covered. Satellite TV systems have been installed in a wide variety of locations, using a bewildering range of equipment. That equipment is beginning to need maintenance and repair. To cope with the volume and variety of work, Nick Beer has written the first guide to satellite TV which concentrates on what to look for and what to do when it goes wrong. This book is up to date and crammed with real-life experience, not theoretical data or manufacturer's ideal specs. Nick Beer has already written the best-selling Servicing Audio and Hi-fi Equipment and is a technical correspondent for many UK and international journals such as Television. He also works as an engineer and teaches satellite servicing to technicians. A practical guide to a new and important area for service engineers Covers indoor and outdoor equipment Written by an experienced author, teacher and engineer
