class is made and remade. This book invokes a Bourdieusian spirit to think about the ways young people are pushed and pulled by the normative demands directed at them from an early age, whilst they reflexively understand that allegedly available incentives for making the 'right' choices and working hard – financial and familial security, social status and job satisfaction – are a declining prospect. In *Youth, Class and Everyday Struggles*, the figures of those classed as 'hipsters' and 'bogans' are used to analyse how representation works to form a symbolic and moral economy that produces and polices fuzzy class boundaries. Further to this, the practices of young people around DIY cultures are analysed to illustrate struggles to create a satisfying and meaningful existence while negotiating

between study, work and creative passions. By thinking through different modalities of struggles, which revolve around meaning making and identity, creativity and authenticity, Threadgold brings Bourdieu ' s sociological practice together with theories of affect, emotion, morals and values to broaden our understanding of how young people make choices, adapt, strategise, succeed, fail and make do. Youth, Class and Everyday Struggles will appeal to undergraduate and postgraduate students, as well as postdoctoral researchers, of fields including: Youth Studies, Class and Inequality, Work and Careers, Subcultures, Media and Creative Industries, Social Theory and Bourdieusian Theory.

How does the use of military drones affect the legal, political, and moral responsibility of different actors involved in their deployment and design? This volume offers a fresh contribution to the ethics of drone warfare by providing, for the first time, a systematic interdisciplinary discussion of different responsibility issues raised by military drones. The book discusses four main sets of questions: First, from a legal point of view, we analyse the ways in which the use of drones makes the attribution of criminal responsibility to individuals for war crimes more complicated and what adjustments may be required in international criminal law and in military practices to avoid 'responsibility gaps' in warfare. From a moral and political perspective, the volume looks at the conditions

under which the use of military drones by states is impermissible, permissible, or even obligatory and what the responsibilities of a state in the use of drones towards both its citizens and potential targets are. From a socio-technical perspective, what kind of new human machine interaction might (and should) drones bring and which new kinds of shared agency and responsibility? Finally, we ask how the use of drones changes our conception of agency and responsibility. The book will be of interest to scholars and students in (military) ethics and to those in law, politics and the military involved in the design, deployment and evaluation of military drones.

earth ' s bio-capacity to supply humanity ' s needs, meaning that people are living off earth ' s capital rather than its income. However, not all countries are equal and this book explores why apparently similar patterns of daily living can lead to larger and smaller environmental impacts. The contributors describe daily life in many different places in the world and then calculate the environmental impact of these ways of living from the perspective of ecological and carbon footprints. This leads to comparison and discussion of what living within the limits of the planet might mean. Current footprints for countries are derived from national statistics and these hide the variety of impacts made by individual people and the choices they make in their daily lives. This book takes a ' bottom-up ' approach by

calculating the footprints of daily living. The purpose is to show that small changes in behaviour now could avoid some very challenging problems in the future. Offering a global perspective on the question of sustainable living, this book will be of great interest to anyone with a concern for the future, as well as students and researchers in environmental studies, human geography and development studies.

War, the ' War on Terror ' and the present era defined by the Islamic State, the Western powers have repeatedly manipulated the region ' s most powerful actors to ensure the security of their own interests and, in doing so, have given rise to religious politics, sectarian war, bloody counter-revolutions and now one of the most brutal incarnations of Islamic extremism ever seen. This is the utterly compelling, systematic dissection of Western interference in the Middle East. Christopher Davidson exposes the dark side of our foreign policy – dragging many disturbing facts out into the light for the first time. Most shocking for us today is his assertion that US intelligence agencies continue to regard the Islamic State, like al-Qaeda before it, as a strategic but volatile asset to be wielded against their enemies.

Unbestritten wird die nationale Sicherheitslage der Bundesrepublik auch in absehbarer Zukunft von asymmetrischen Bedrohungen geprägt sein. Dies gilt umso mehr, da Deutschland aufgrund seiner außenpolitischen Verantwortung in NATO, UNO und EU auch weiterhin verstärkt an internationalen Stabilisierungsmissionen beteiligt sein wird. So scheint es auch für künftige Einsatzkonzeptionen zweckmäßig, nicht nur die jüngst beispielsweise im Rahmen der ISAF-Mission in Afghanistan gesammelten Erfahrungen heranzuziehen, sondern sich auch grundständig mit dem Phänomen asymmetrischer Konflikte auseinanderzusetzen. Um die Prinzipien, Strategien und Vorgehensweisen derartiger Konflikte zu verstehen und mit deren Hilfe auch für die Zukunft
