Treatment Testicular Cancer
Guidelines

Surveillance, adjuvant
chemotherapy or radiotherapy
are all options for stage 1
Seminoma. 15-20% of Stage 1
seminomas will recur on
surveillance. Treatment with
either chemotherapy or
radiotherapy results in a
reduction in recurrence rate
from 15-20% to less than
3-4%. 9.1 Chemotherapy.

Testicular Cancer, by Type and Stage

The treatment plan depends on the stage and type of testicular cancer. Usually you have surgery, and might have chemotherapy or radiotherapy after surgery.

Treatment | Testicular cancer | Cancer Research UK
After surgery (adjuvant chemotherapy) You might have chemotherapy after surgery to remove a testicle. This treatment lowers the chance of early stage cancer coming back. It is called adjuvant chemotherapy. For early stage seminoma you usually have 1 treatment with the
